Rita,

An application has been developed call Demographic Profile that provides a snap-shot of relatively current information. However, this application does not provide comparisons versus prior period(s). If you are interested, I will attempt to get this application installed on your machine (although it may have to wait until after the hardware upgrade). In the meantime, please send me your specifications and I will try to run it here.

Bruce,

DP is still very much alive. I believe it is now being handled by Hilda (with the new re-org). The only problem that I could see getting it installed, is the field hardware upgrade. It needs to be tested by I&L (as any app to be sent out to the field) and distributed. Right now, they are not sending out any applications until the upgrade is complete (late December/January).

Sue

Is the Demographic Profile system still around? If so, are you aware of any obstacles to getting it loaded on the Region Analyst's machines?

Hi Bruce,

HELP!!

Could you direct me to the source that could provide demographic data that is needed to complete Region and Section game plans. I need data that indicates the population growth and changes for age groups, race and income.

Thanks,
Rita
